# **SECTION 2: Hazards identification**

#### 2.1 Classification of the substance or mixture

**Product definition** : Mixture

# Classification according to Regulation (EC) No. 1272/2008 [CLP/GHS]

Skin Irrit. 2, H315 Skin Sens. 1, H317

STOT SE 3, H335 (Respiratory tract irritation)

**STOT RE 1, H372** 

The product is classified as hazardous according to Regulation (EC) 1272/2008 as amended.

See Section 16 for the full text of the H statements declared above.

See Section 11 for more detailed information on health effects and symptoms.

#### 2.2 Label elements

Hazard pictograms

Signal word : Danger

**Hazard statements** : H315 Causes skin irritation.

H317 May cause an allergic skin reaction. H335 May cause respiratory irritation.

H372 Causes damage to organs through prolonged or repeated exposure.

**Precautionary statements** 

General : P103 - Read carefully and follow all instructions.P102 - Keep out of

reach of children.P101 - If medical advice is needed, have product

container or label at hand.

**Prevention**: P280 - Wear protective gloves. P271 - Use only outdoors or in a

well-ventilated area. P260 - Do not breathe vapor. P270 - Do not eat, drink or smoke when using this product. P264 - Wash thoroughly

after handling.

**Response**: P314 - Get medical advice or attention if you feel unwell. P304 - IF

INHALED: P304 + P312 - Call a POISON CENTER or doctor if you feel unwell. P362 + P364 - Take off contaminated clothing and wash it before reuse. P302 - IF ON SKIN: P302 + P352 - Wash with plenty of water. P333 - If skin irritation or rash occurs: P333 + P313 - Get

medical advice or attention.

Storage : P405 - Store locked up.P403 + P233 - Store in a well-ventilated

place. Keep container tightly closed.

**Disposal**: P501 - Dispose of contents and container in accordance with all

local, regional, national and international regulations.

Hazardous ingredients : cyclohexanol

bornan-2-one

N-(2-ethylhexyl)-1-[[3-methyl-4-[(3-

methylphenyl)azo]phenyl]azo]naphthalen-2-amine

**Supplemental label elements** : Not applicable.

Annex XVII - Restrictions on the manufacture, placing on the market and use of certain

dangerous substances, mixtures

and articles

Not applicable.

**Special packaging requirements** 

Containers to be fitted with child-resistant fastenings

Yes, applicable.

**Tactile warning of danger** : Yes, applicable.

#### 2.3 Other hazards

**Product meets the criteria**: This mixture does not contain any substances that are assessed to be a PBT or a

for PBT or vPvB

according to Regulation (EC) No. 1907/2006,

Annex XIII

Other hazards which do not result in classification

: None known.

vPvB.

# **SECTION 3: Composition/information on ingredients**

#### 3.2 Mixtures : Mixture

| Product/ingredient name  | Identifiers   | %             | Classification   | Specific Conc. Limits, M-<br>factors and ATEs                       | Туре |
|--|---|---------------|--|---|------|
| cyclohexanol   | EC: 203-630-6<br>CAS: 108-93-0<br>Index: 603-009-00-3 | >= 10 - <= 25 | Acute Tox. 4, H302<br>Acute Tox. 4, H332<br>Skin Irrit. 2, H315<br>STOT SE 3, H335<br>(Respiratory tract irritation) | ATE [Oral] = 1.400 mg/kg<br>ATE [Inhalation (vapours)] = 11<br>mg/l | [1]  |

| N-(2-ethylhexyl)-1-[[3-methyl-4-[(3-methylphenyl)azo]phenyl]azo]naphthalen-2-amine | EC : 260-125-3<br>CAS : 56358-10-2                    | > 0 - <= 0,3  | Skin Irrit. 2, H315<br>Skin Sens. 1, H317  | -   | [1]  |

See Section 16 for the full text of the H statements declared above.

There are no additional ingredients present which, within the current knowledge of the supplier and in the concentrations applicable, are classified as hazardous to health or the environment, are PBTs, vPvBs or Substances of equivalent concern, or have been assigned a workplace exposure limit and hence require reporting in this section.

#### **Type**

[1] Substance classified with a health or environmental hazard Occupational exposure limits, if available, are listed in Section 8.

# **SECTION 4: First aid measures**

#### **4.1** Description of first aid measures

Immediately flush eyes with plenty of water, occasionally lifting the Eye contact upper and lower eyelids. Check for and remove any contact lenses. Continue to rinse for at least 10 minutes. Get medical attention.

Inhalation Remove victim to fresh air and keep at rest in a position comfortable

for breathing. If it is suspected that fumes are still present, the rescuer should wear an appropriate mask or self-contained breathing apparatus. If not breathing, if breathing is irregular or if respiratory arrest occurs, provide artificial respiration or oxygen by trained personnel. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation. Get medical attention. If necessary, call a poison center or physician. If unconscious, place in recovery position and get medical attention immediately. Maintain an open airway. Loosen tight clothing such as a collar, tie, belt or waistband.

Skin contact Wash with plenty of soap and water. Remove contaminated clothing

and shoes. Wash contaminated clothing thoroughly with water before removing it, or wear gloves. Continue to rinse for at least 10 minutes. Get medical attention. In the event of any complaints or symptoms, avoid further exposure. Wash clothing before reuse. Clean shoes

thoroughly before reuse.

**Ingestion** Wash out mouth with water. Remove dentures if any. If material has

been swallowed and the exposed person is conscious, give small quantities of water to drink. Stop if the exposed person feels sick as vomiting may be dangerous. Do not induce vomiting unless directed to do so by medical personnel. If vomiting occurs, the head should be kept low so that vomit does not enter the lungs. Get medical attention following exposure or if feeling unwell. Never give anything by mouth to an unconscious person. If unconscious, place in recovery position and get medical attention immediately. Maintain an open

airway. Loosen tight clothing such as a collar, tie, belt or waistband.

No action shall be taken involving any personal risk or without suitable training. If it is suspected that fumes are still present, the rescuer should wear an appropriate mask or self-contained breathing apparatus. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation. Wash contaminated clothing thoroughly with water before removing it, or wear gloves.

#### 4.2 Most important symptoms and effects, both acute and delayed

#### Over-exposure signs/symptoms

**Protection of first-aiders** 

Adverse symptoms may include the following: pain or irritation, Eye contact

watering, redness

Inhalation Adverse symptoms may include the following: respiratory tract

irritation, coughing

**Skin contact** Adverse symptoms may include the following: irritation, redness

**Ingestion** No specific data.

# 4.3 Indication of any immediate medical attention and special treatment needed

Date of issue/Date of revision: 13.06.2023 Version: 3.0 Date of previous issue: 27.04.2023 Notes to physician : Treat symptomatically. Contact poison treatment specialist immediately if large quantities have been ingested or inhaled.

**Specific treatments** : No specific treatment.

# **SECTION** 5: Firefighting measures

#### 5.1 Extinguishing media

Suitable extinguishing media Unsuitable extinguishing media : Use an extinguishing agent suitable for the surrounding fire.

None known.

#### 5.2 Special hazards arising from the substance or mixture

Hazards from the substance or mixture

: In a fire or if heated, a pressure increase will occur and the container may burst. Fire water contaminated with this material must be contained and prevented from being discharged to any waterway, sewer or drain.

**Hazardous combustion products** 

Decomposition products may include the following materials: carbon dioxide, carbon monoxide Decomposition products may include the following materials: carbon dioxide, carbon monoxide

#### **5.3** Advice for firefighters

Special protective actions for fire-fighters

: Promptly isolate the scene by removing all persons from the vicinity of the incident if there is a fire. No action shall be taken involving any personal risk or without suitable training.

Special protective equipment for fire-fighters

: Fire-fighters should wear appropriate protective equipment and self-contained breathing apparatus (SCBA) with a full face-piece operated in positive pressure mode. Clothing for fire-fighters (including helmets, protective boots and gloves) conforming to European standard EN 469 will provide a basic level of protection for chemical incidents.

# **SECTION 6: Accidental release measures**

#### 6.1 Personal precautions, protective equipment and emergency procedures

For non-emergency personnel

No action shall be taken involving any personal risk or without suitable training. Evacuate surrounding areas. Keep unnecessary and unprotected personnel from entering. Do not touch or walk through spilled material. Avoid breathing vapor or mist. Provide adequate ventilation. Wear appropriate respirator when ventilation is inadequate. Put on appropriate personal protective equipment.

For emergency responders

: If specialized clothing is required to deal with the spillage, take note of any information in Section 8 on suitable and unsuitable materials. See also the information in "For non-emergency personnel".

#### **6.2** Environmental precautions

: Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers. Inform the relevant authorities if the product has caused environmental pollution (sewers, waterways, soil or air). Water polluting material. May be harmful to the environment if released in large quantities.

#### 6.3 Methods and materials for containment and cleaning up

Small spill : Stop leak if without risk. Move containers from spill area. Dilute

with water and mop up if water-soluble. Alternatively, or if water-insoluble, absorb with an inert dry material and place in an appropriate waste disposal container. Dispose of via a licensed waste disposal contractor.

Large spill

- : Stop leak if without risk. Move containers from spill area. Approach release from upwind. Prevent entry into sewers, water courses, basements or confined areas. Wash spillages into an effluent treatment plant or proceed as follows. Contain and collect spillage with non-combustible, absorbent material e.g. sand, earth, vermiculite or diatomaceous earth and place in container for disposal according to local regulations. Dispose of via a licensed waste disposal contractor. Contaminated absorbent material may pose the same hazard as the spilled product.
- **6.4** Reference to other sections
- See Section 1 for emergency contact information.

  See Section 8 for information on appropriate personal protective equipment.

  See Section 13 for additional waste treatment information.

# **SECTION 7: Handling and storage**

The information in this section contains generic advice and guidance. The list of Identified Uses in Section 1 should be consulted for any available use-specific information provided in the Exposure Scenario(s).

#### 7.1 Precautions for safe handling

**Protective measures** 

: Put on appropriate personal protective equipment (see Section 8). Persons with a history of skin sensitization problems should not be employed in any process in which this product is used. Do not get in eyes or on skin or clothing. Do not breathe vapor or mist. Do not ingest. Avoid release to the environment. Use only with adequate ventilation. Wear appropriate respirator when ventilation is inadequate. Keep in the original container or an approved alternative made from a compatible material, kept tightly closed when not in use. Empty containers retain product residue and can be hazardous. Do not reuse container.

Advice on general occupational hygiene

Eating, drinking and smoking should be prohibited in areas where this material is handled, stored and processed. Workers should wash hands and face before eating, drinking and smoking. Remove contaminated clothing and protective equipment before entering eating areas. See also Section 8 for additional information on hygiene measures.

#### 7.2 Conditions for safe storage, including any incompatibilities

Store in accordance with local regulations. Store in original container protected from direct sunlight in a dry, cool and well-ventilated area, away from incompatible materials (see Section 10) and food and drink. Store locked up. Keep container tightly closed and sealed until ready for use. Containers that have been opened must be carefully resealed and kept upright to prevent leakage. Do not store in unlabeled containers. Use appropriate containment to avoid environmental contamination. See Section 10 for incompatible materials before handling or use.

#### **7.3** Specific end use(s)

**Recommendations** : Not available. **Industrial sector specific** : Not available.

solutions

# **SECTION 8: Exposure controls/personal protection**

The information in this section contains generic advice and guidance. Information is provided based on typical anticipated uses of the product. Additional measures might be required for bulk handling or other uses that could significantly increase worker exposure or environmental releases.

## **8.1** Control parameters

## Occupational exposure limits

No exposure limit value known.

## **Biological exposure indices**

No exposure indices known.

# Recommended monitoring procedures

: Reference should be made to monitoring standards, such as the following: European Standard EN 689 (Workplace atmospheres - Guidance for the assessment of exposure by inhalation to chemical agents for comparison with limit values and measurement strategy) European Standard EN 14042 (Workplace atmospheres - Guide for the application and use of procedures for the assessment of exposure to chemical and biological agents) European Standard EN 482 (Workplace atmospheres - General requirements for the performance of procedures for the measurement of chemical agents) Reference to national guidance documents for methods for the determination of hazardous substances will also be required.

# **DNELs/DMELs**

| Product/ingredient name | Type | Exposure   | Value                  | Population | Effects  |
|-------------------------|------|------------|------------------------|------------|----------|
| cyclohexanol            | DNEL | Long term  | 1,43 mg/kg             | Workers    | Systemic |
|                         |      | Dermal     | bw/day                 |            |          |
|                         | DNEL | Long term  | 0,716 mg/kg            | General    | Systemic |
|                         |      | Dermal     | bw/day                 | population |          |
|                         | DNEL | Long term  | 0,716 mg/kg            | General    | Systemic |
|                         |      | Oral       | bw/day                 | population |          |
|                         | DNEL | Long term  | 40,3 mg/m <sup>3</sup> | Workers    | Systemic |
|                         |      | Inhalation |                        |            |          |
|                         | DNEL | Long term  | 10 mg/m <sup>3</sup>   | General    | Systemic |
|                         |      | Inhalation |                        | population |          |
| bornan-2-one            | DNEL | Long term  | 4,3478                 | General    | Systemic |
|                         |      | Inhalation | mg/m³                  | population |          |
|                         | DNEL | Long term  | 17,6316                | Workers    | Systemic |
|                         |      | Inhalation | mg/m³                  |            |          |
|                         | DNEL | Long term  | 5 mg/kg                | General    | Systemic |
|                         |      | Dermal     | bw/day                 | population |          |
|                         | DNEL | Long term  | 5 mg/kg                | General    | Systemic |
|                         |      | Oral       | bw/day                 | population |          |
|                         | DNEL | Long term  | 10 mg/kg               | Workers    | Systemic |
|                         |      | Dermal     | bw/day                 |            |          |

## **PNECs**

No PNECs available.

#### **8.2** Exposure controls

and method of use.

**Appropriate engineering controls** 

Use only with adequate ventilation. If user operations generate dust, fumes, gas, vapor or mist, use process enclosures, local exhaust ventilation or other engineering controls to keep worker exposure to airborne contaminants below any recommended or statutory limits.

# <u>Individual protection measures</u>

Hygiene measures

Wash hands, forearms and face thoroughly after handling chemical products, before eating, smoking and using the lavatory and at the end of the working period. Appropriate techniques should be used to remove potentially contaminated clothing. Contaminated work clothing should not be allowed out of the workplace. Wash contaminated clothing before reusing. Ensure that eyewash stations and safety showers are close to the workstation location.

Eye/face protection

It is recommended to wear a hooded visor or protective visor combined with airtight goggles (ref. Standard EN 166).

## Skin protection Hand protection

Protect hands with category III work gloves (ref. Standard EN 374). For the final choice of the material of the work gloves it is necessary to consider: compatibility, degradation, breakage time and permeation. In the case of preparations, the resistance of work gloves to chemical agents must be checked before use as it is not foreseeable. Gloves have a wear time that depends on the duration

**Body protection** 

Personal protective equipment for the body should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product.

Other skin protection

Appropriate footwear and any additional skin protection measures should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product.

**Respiratory protection** 

Based on the hazard and potential for exposure, select a respirator that meets the appropriate standard or certification. Respirators must be used according to a respiratory protection program to ensure proper fitting, training, and other important aspects of use. In case of exceeding the threshold value (e.g. TLV-TWA) of the substance or of one or more of the substances present in the product, it is recommended to wear a mask with type AX filter whose limit of use will be defined by the manufacturer (ref. . standard EN 14387). If there are gases or vapors of a different nature and / or gases or vapors with particles (aerosols, fumes, mists, etc.), combined filters must be provided. The use of respiratory protection means is necessary in case the technical measures adopted are not sufficient to limit the exposure of the worker to the threshold values taken into consideration. The protection offered by the masks is however limited. In the event that the substance in question is odorless or its olfactory threshold is higher than the relative TLV-TWA and in the event of an emergency, wear an open-circuit compressed air breathing apparatus (ref. Standard EN 137) or a self-contained breathing apparatus. outdoor air (ref. EN 138 standard). For the correct choice of the respiratory protection device, refer to the EN 529 standard.

**Environmental exposure controls** 

Emissions from ventilation or work process equipment should be checked to ensure they comply with the requirements of environmental protection legislation. In some cases, fume scrubbers, filters or engineering modifications to the process equipment will be necessary to reduce emissions to acceptable levels.

# **SECTION 9: Physical and chemical properties**

The conditions of measurement of all properties are at standard temperature and pressure unless otherwise indicated.

**Conclusion/Summary** 

Skin: Not available.Eyes: Not available.Respiratory: Not available.

## **Sensitization**

Conclusion/Summary

Skin: Not available.Respiratory: Not available.

**Mutagenicity** 

**Conclusion/Summary** : Not available.

**Carcinogenicity** 

**Conclusion/Summary** : Not available.

Reproductive toxicity

**Conclusion/Summary** : Not available.

**Teratogenicity** 

**Conclusion/Summary** : Not available.

### Specific target organ toxicity (single exposure)

| Product/ingredient name | Category   | Route of exposure | Target organs                |
|-------------------------|------------|-------------------|------------------------------|
| cyclohexanol            | Category 3 | =                 | Respiratory tract irritation |

## Specific target organ toxicity (repeated exposure)

| Product/ingredient name | Category   | Route of exposure | Target organs |
|-------------------------|------------|-------------------|---------------|
| bornan-2-one            | Category 1 | -                 | -             |

#### **Aspiration hazard**

Not available.

Information on the likely routes :

of exposure

Not available.

# Potential acute health effects

**Eye contact** : No known significant effects or critical hazards.

**Inhalation** : May cause respiratory irritation.

**Skin contact**: Causes skin irritation. May cause an allergic skin reaction.

**Ingestion**: No known significant effects or critical hazards.

## Symptoms related to the physical, chemical and toxicological characteristics

**Eye contact** : Adverse symptoms may include the following: pain or irritation,

watering, redness

**Inhalation** : Adverse symptoms may include the following: respiratory tract

irritation, coughing

**Skin contact** : Adverse symptoms may include the following: irritation, redness

**Ingestion** : No specific data.

#### Delayed and immediate effects and also chronic effects from short and long term exposure

# Short term exposure

Potential immediate effects : Not available.
Potential delayed effects : Not available.

#### Long term exposure

Potential immediate effects : Not available.

Potential delayed effects : Not available.

### Potential chronic health effects

**Conclusion/Summary** : Not available.

**General** : Causes damage to organs through prolonged or repeated exposure.

Once sensitized, a severe allergic reaction may occur when

subsequently exposed to very low levels.

Carcinogenicity
 Mutagenicity
 No known significant effects or critical hazards.
 Reproductive toxicity
 No known significant effects or critical hazards.
 No known significant effects or critical hazards.

#### 11.2. Information on other hazards

**11.2.1 Endocrine disrupting properties** : Not available. **11.2.2 Other information** : Not available.

# **SECTION 12: Ecological information**

#### 12.1 Toxicity

| Product/ingredient name | Result                    | Species                    | Exposure |
|-------------------------|---------------------------|----------------------------|----------|
| cyclohexanol            |                           |                            |          |
|                         | Acute LC50 704 mg/l Fresh | Fish - Pimephales promelas | 96 h     |
|                         | water                     |                            |          |

**Conclusion/Summary** : Not available.

# 12.2 Persistence and degradability

**Conclusion/Summary** : Not available.

## 12.3 Bioaccumulative potential

| Product/ingredient name | LogPow  | BCF | Potential |
|-------------------------|---------|-----|-----------|
| cyclohexanol            | 1,21,25 | -   | low       |
| bornan-2-one            | 2,38    | -   | low       |

## 12.4 Mobility in soil

**Soil/water partition coefficient** : Not available.

(KOC)

**Mobility** : Not available.

### 12.5 Results of PBT and vPvB assessment

This mixture does not contain any substances that are assessed to be a PBT or a vPvB.

**12.6 Endocrine disrupting properties** : Not available.

**12.7 Other adverse effects** : No known significant effects or critical hazards.

# **SECTION 13: Disposal considerations**

The information in this section contains generic advice and guidance. The list of Identified Uses in Section 1 should be consulted for any available use-specific information provided in the Exposure Scenario(s).

#### 13.1 Waste treatment methods

### **Product**

Methods of disposal

The generation of waste should be avoided or minimized wherever possible. Disposal of this product, solutions and any by-products should at all times comply with the requirements of environmental protection and waste disposal legislation and any regional local authority requirements. Dispose of surplus and non-recyclable products via a licensed waste disposal contractor. Waste should not be disposed of untreated to the sewer unless fully compliant with the requirements of all authorities with jurisdiction.

Hazardous waste

The classification of the product may meet the criteria for a hazardous waste.

#### **Packaging**

Methods of disposal

: The generation of waste should be avoided or minimized wherever possible. Waste packaging should be recycled. Incineration or landfill should only be considered when recycling is not feasible.

| Type of packaging |           | European waste catalogue (EWC)                      |  |  |  |
|-------------------|-----------|---|--|--|--|
|                   | 15 01 10* | packaging containing residues of or contaminated by |  |  |  |
|                   |           | hazardous substances                                |  |  |  |

**Special precautions** 

: This material and its container must be disposed of in a safe way. Care should be taken when handling emptied containers that have not been cleaned or rinsed out. Empty containers or liners may retain some product residues. Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers.

# **SECTION 14: Transport information**

|                                    | ADR/RID        | IMDG           | IATA           |  |  |
|------------------------------------|----------------|----------------|----------------|--|--|
| 14.1 UN number                     | -              | -              | -              |  |  |
| 14.2 UN proper shipping name       | Not regulated. | Not regulated. | Not regulated. |  |  |
| 14.3 Transport<br>hazard class(es) | -              | -              | -              |  |  |

IATA

The environmentally hazardous substance mark may appear if required by other transportation regulations.

14.6 Special precautions for user

Transport within user's premises: always transport in closed containers that are upright and secure. Ensure that persons transporting the product know what to do in the event of an accident or spillage.

14.7 Transport in bulk according to IMO instruments

Not available.

# **SECTION 15: Regulatory information**

15.1 Safety, health and environmental regulations/legislation specific for the substance or mixture

#### EU Regulation (EC) No. 1907/2006 (REACH)

# Annex XIV - List of substances subject to authorization

#### Annex XIV

None of the components are listed.

#### **Substances of very high concern**

None of the components are listed.

Annex XVII - Restrictions on the manufacture, placing on the market and use of certain dangerous substances, mixtures and articles Not applicable.

#### **Other EU regulations**

**Industrial emissions (integrated** 

Not listed

pollution prevention

and control) - Air Industrial emissions (integrated

**ntegrated** : Not listed

pollution prevention and control) - Water

Ozone depleting substances (1005/2009/EU)

None of the components are listed.

# Prior Informed Consent (PIC) (649/2012/EU)

None of the components are listed.

#### **Persistent Organic Pollutants**

None of the components are listed.

#### Seveso Directive

This product is not controlled under the Seveso Directive.

# **National regulations**

# **International regulations**

# Chemical Weapon Convention List Schedules I, II & III Chemicals

#### **Chemical Weapons Convention List Schedule I Chemicals**

None of the components are listed.

#### **Chemical Weapons Convention List Schedule II Chemicals**

None of the components are listed.

## **Chemical Weapons Convention List Schedule III Chemicals**

None of the components are listed.

### **Montreal Protocol**

None of the components are listed.

## **Stockholm Convention on Persistent Organic Pollutants**

# **Annex A - Elimination - Production**

None of the components are listed.

#### Annex A - Elimination - Use

None of the components are listed.

#### **Annex B - Restriction - Production**

None of the components are listed.

#### **Annex B - Restriction - Use**

None of the components are listed.

## **Annex C - Unintentional - Production**

None of the components are listed.

## **Rotterdam Convention on Prior Informed Consent (PIC)**

## Rotterdam Convention on Prior Informed Consent (PIC) - Industrial

None of the components are listed.

#### Rotterdam Convention on Prior Informed Consent (PIC) - Pesticide

None of the components are listed.

## Rotterdam Convention on Prior Informed Consent (PIC) -Severely hazardous pesticide

None of the components are listed.

## **UNECE Aarhus Protocol on POPs and Heavy Metals**

#### **Heavy metals - Annex 1**

None of the components are listed.

#### POPs - Annex 1 - Production

None of the components are listed.

#### POPs - Annex 1 - Use

None of the components are listed.

## POPs - Annex 2

None of the components are listed.

#### POPs - Annex 3

None of the components are listed.

## **Inventory list**

**New Zealand** 

**Philippines** 

Australia: Not determined.Canada: Not determined.China: Not determined.

Eurasian Economic Union : Russian Federation inventory: Not determined.

Japan : Japan inventory (CSCL): Not determined.

Japan inventory (ISHL): Not determined.
Not determined.
Not determined.
Not determined.

Republic of KoreaNot determined.TaiwanNot determined.ThailandNot determined.TurkeyNot determined.

United States : At least one component is inactive.

Viet Nam : All components are listed or exempted.

15.2 Chemical Safety Assessment : This product contains substances for which Chemical Safety

Assessments are still required.

# **SECTION 16: Other information**

**Abbreviations and acronyms** : ATE = Acute Toxicity Estimate

CLP = Classification, Labelling and Packaging Regulation

[Regulation (EC) No. 1272/2008] DMEL = Derived Minimal Effect Level DNEL = Derived No Effect Level

EUH statement = CLP-specific Hazard statement

N/A = Not available

PBT = Persistent, Bioaccumulative and Toxic PNEC = Predicted No Effect Concentration RRN = REACH Registration Number

SGG = Segregation Group

 $vPvB = Very \ Persistent \ and \ Very \ Bioaccumulative$ 

#### Procedure used to derive the classification according to Regulation (EC) No. 1272/2008 [CLP/GHS]

| Classification                                 | Justification      |
|--|--------------------|
| Skin Irrit. 2, H315                            | Calculation method |
| Skin Sens. 1, H317                             | Calculation method |
| STOT SE 3, H335 (Respiratory tract irritation) | Calculation method |
| STOT RE 1, H372                                | Calculation method |

## Full text of abbreviated H statements

| H228 | Flammable solid.  |
|------|---|
| H302 | Harmful if swallowed.   |
| H315 | Causes skin irritation.   |
| H317 | May cause an allergic skin reaction.                            |
| H332 | Harmful if inhaled.   |
| H335 | May cause respiratory irritation.                               |
| H372 | Causes damage to organs through prolonged or repeated exposure. |
| H413 | May cause long lasting harmful effects to aquatic life.         |

## Full text of classifications [CLP/GHS]

| Acute Tox. 4      | ACUTE TOXICITY - Category 4                          |
|-------------------|--|
| Aquatic Chronic 4 | AQUATIC HAZARD (LONG-TERM) - Category 4              |
| Flam. Sol. 2      | FLAMMABLE SOLIDS - Category 2                        |
| Skin Irrit. 2     | SKIN CORROSION/IRRITATION - Category 2               |
| Skin Sens. 1      | SKIN SENSITIZATION - Category 1                      |
| STOT RE 1         | SPECIFIC TARGET ORGAN TOXICITY (REPEATED EXPOSURE) - |
|                   | Category 1   |
| STOT SE 3         | SPECIFIC TARGET ORGAN TOXICITY (SINGLE EXPOSURE) -   |
|                   | Category 3   |
